KHURAM SHEHZAD BAIG

GIS SPECIALIST | GIS DEVELOPER | ENTERPRISE GIS & WEB GIS

MCS

Riyadh, Saudi Arabia | +966 578069153 | khuram.s.baig@gmail.com | LinkedIn | Supporting Stuff

PROFESSIONAL SUMMARY

GIS Specialist and GIS Full-Stack Developer with 5+ years of experience delivering enterprise GIS, web mapping, spatial analysis, and geospatial automation. Hands-on with ArcGIS Enterprise, ArcGIS Pro, ArcGIS Server/Portal, ArcPy, Python, REST services, and enterprise geodatabases. Built and supported GIS applications, migrated legacy solutions, improved geodatabase workflows, and integrated spatial services with enterprise systems. Based in Riyadh; available for immediate joining and Iqama transfer, if still accurate.

CORE COMPETENCIES

CORE COMPETENCIES

- **Esri GIS Platforms:** ArcGIS Enterprise, ArcGIS Server, Portal, ArcGIS Pro, ArcGIS Online administration
- **Spatial Analysis & Data:** Spatial analysis, geoprocessing, enterprise geodatabases, ArcSDE, vector and raster data, spatial data migration, cleansing, deduplication, and quality improvement
- **GIS Automation & Programming:** Python, ArcPy, ArcGIS API for Python, ModelBuilder, GIS workflow automation
- **Web GIS & Applications:** ArcGIS Maps SDK for JavaScript, Angular with ArcGIS REST services, Experience Builder Developer Edition, React.js custom widget development and deployment, web maps, dashboards, and GIS applications
- **3D GIS & Emerging Technologies:** 3D WebScenes, digital twins, GeoAI for change detection, BIM-GIS integration
- **Field Data & Remote Sensing:** Survey123, FME, remote sensing, GPS/GNSS, field data collection and integration
- **Databases & Integration:** SQL Server, Oracle, PostgreSQL/PostGIS, spatial SQL, REST/API integration, GIS and feature services, enterprise application and workflow integration
- **Data Management & Cartography:** Geodatabase management, map production, data maintenance, data validation, and GIS quality checks
- **DevOps & Support:** Azure DevOps, CI/CD, Visual Studio, VS Code, IIS, deployment support, troubleshooting, and defect resolution
- **Project Delivery:** Agile/Scrum, requirements gathering, solution design, testing, deployment, technical documentation, user support, and multidisciplinary collaboration
- **GIS Software:** QGIS

PROFESSIONAL EXPERIENCE

GIS SPECIALIST | GeoConsult — Riyadh, Saudi Arabia

- Develop and maintain enterprise GIS applications, web GIS tools, and geospatial services for operational and decision-support workflows.
- Configure and administer ArcGIS Enterprise components, including Portal, ArcGIS Server, GeoAI, FME, Survey123, GIS service layers and feature services.
- Build and integrate GIS services and REST APIs with Angular web applications and enterprise systems.
- Develop interactive GIS dashboards, analytics tools, 360° panoramic viewers, and 3D WebScenes for spatial visualization.
- Customize and integrate Esri widgets and components using Experience Builder Developer Edition.
- Support GIS workflows, troubleshoot application/service integration issues, and prepare deployment and operational documentation.

Atheeb Integrated Solutions Company for Technologies—Riyadh, Saudi Arabia

GIS Full Stack Developer / Lead | Sep 2024 – Apr 2026

- Architected and developed enterprise applications using ASP.NET Core, C#, Entity Framework, Clean Architecture and SOLID principles.
- Developed Angular and JavaScript applications integrating enterprise GIS services and APIs.
- Developed geospatial functionality using ArcGIS and CesiumJS, including advanced 3D visualization, ERDAS Imagine.
- Designed and implemented RESTful APIs and integration services for enterprise workflows.
- Managed Azure DevOps CI/CD pipelines, deployments and Agile sprint delivery.
- Integrated PostgreSQL and enterprise geospatial technologies; investigated and resolved application, API, GIS-service and integration issues.

Geotech — Riyadh, Saudi Arabia *GIS Specialist & Developer | Dec 2023 – Nov 2024*

- Migrated legacy desktop GIS applications to modern web platforms with minimal downtime and controlled data migration.
- Redesigned enterprise geodatabase architecture, performed data cleansing/deduplication and optimized spatial query performance.
- Created UML documentation for workflows, system architecture and database schemas.
- Administered VM servers and supported legacy .NET applications during transition to modern GIS solutions.

Ministry of Industry and Mineral Resources (Outsourced by MIS)

- *GIS Development & Automation | May 2017 – Dec 2023*
- Led migration of legacy GIS applications to ArcGIS Enterprise Portal and Experience Builder Developer Edition.
- Developed enterprise web GIS applications using ArcGIS Maps SDK/JS API, JavaScript and REST APIs.
- Integrated GIS services with Oracle and SQL Server databases and enterprise application workflows.
- Automated geospatial workflows and reporting using Python and ArcObjects; supported geoprocessing and data-processing activities.
- Administered ArcGIS Server, Portal, ArcSDE, IIS and enterprise geoprocessing services.
- Managed requirements, solution design, development, testing, deployment, user training and technical support.

Dar AlTanmiyat *GIS Developer & Analyst | 2016 – 2017*

- Developed interactive web GIS applications for demographic analysis, location intelligence, spatial reporting and print/PDF map exports.
- Implemented geographic selection and interactive mapping tools using ArcGIS Server Enterprise and Esri JS API with jQuery/Dojo.

Riyadh Municipality *GIS Developer | 2008 – 2011*

- Developed enterprise GIS web applications supporting investment location selection, spatial analysis, revenue tracking, fines management and contract workflows.
- Developed map-enabled analytical reports combining spatial information with operational and business data.
- Designed and deployed ArcGIS Server Enterprise solutions integrated with Oracle and ArcSDE.
- Developed ASP.NET/ADO.NET backend components and managed spatial data, geoprocessing services and GIS/database integration.

Riyad Bank *GIS Business Analyst & Programmer — Banking Sector Projects | 2007 – 2008*

- Performed geospatial and demographic analysis using vector and raster data to support investment planning and risk assessment.
- Developed GIS applications for property analysis, revenue tracking, contract monitoring and map-based decision support.
- Managed GIS delivery from requirements and solution proposals through implementation using ArcGIS Desktop/Server, ArcIMS, Oracle and ArcSDE.

MOMRA / Aero Map — Riyadh *Cartographic Mapping Specialist | ~2003 – 2006*

- Developed vehicle tracking, route optimization, POI and LBS solutions supported by spatial databases.
- Produced cartographic maps, digitized aerial imagery and managed spatial/attribute data workflows using MicroStation.

EARLIER CAREER

- Software Developer — Communication System International, Lahore | ~2006–2007
- Intern — NADRA, Pakistan | 2006

EDUCATION & CERTIFICATIONS

- Master of Computer Science (MCS) — University of Lahore, Pakistan | Capstone: GIS Application for Lahore City using ESRI JavaScript Web API
- Post Graduate Diploma in Software Engineering — Government FC College, Lahore, Pakistan
- PMP® — Project Management Institute | PMI-ACP® | Professional Scrum Master (PSM I®)
- Esri Certifications: ArcGIS Pro Basics, ArcGIS Maps for Office Basics, Telling Stories with GIS Maps

ADDITIONAL INFORMATION

- Current location: Riyadh, Saudi Arabia | Immediate transfer able Iqama
- Languages: English (Fluent), Urdu (Native), Arabic (Basic)
- Driving License: Valid Saudi Arabian Driving License
